

REMARKS**REFERENCE TO PRIOR APPLICATIONS**

The Examiner objected to the paragraph relating to the prior related applications added by numbered paragraph 5 of the REQUEST FOR DIVISIONAL APPLICATION UNDER 37 C.F.R. 1.60 filed February 2, 2004 in that a refer to the application has a DIVISIONAL whereas it should be a CONTINUATION of the prior application.

Accordingly, Applicants have proposed deleting the paragraph referring to the prior applications and replacing it with a paragraph properly describing the present application as a "CONTINUATION APPLICATION."

TITLE

The title of the invention was objected to as not being descriptive. Accordingly, Applicants have deleted the original title and have amended the title to read "GAS TURBINE HAVING A COOLING AIR SYSTEM AND SPRAY AIR SYSTEM." Since this title was approved in the prior related applications, it is believed that this amended title is appropriate for the present application.

RESPONSE TO AMENDMENT

The amendments to the specification filed with the present application on February 2, 2004 were objected to as not complying with the current rules which require a marked up replacement copy of the replacement paragraphs. Accordingly, Applicants have amended the specification by including a marked up replacement copy of the replacement paragraphs.

It is believed that Applicants have now complied with the various formalities objected to in the Office Action mailed November 16, 2004 and that this case is now in condition for allowance.

In view of the foregoing amendments and remarks, Applicants contend that this application is in condition for allowance. Accordingly, reconsideration and reexamination are respectfully requested.

Respectfully submitted,

Gene W. Stockman
